

NOBLE OSITA IHUOMA

ihuomanoble@gmail.com | (+234) 806-488-5653 | Lugbe, Abuja.

PROFILE SUMMARY

As a computer science professional with over 5 years of experience, I am proficient in a variety of programming languages and technologies. My expertise includes programming, frontend development, data science, microsoft packages, computer engineering and graphics design respectively. I have experience in developing and managing several websites and applications, including social media-savvy activities. I am a detail-oriented problem solver with a strong ability to analyze complex systems and develop innovative solutions. My experience working on both individual and team projects has given me excellent communication and collaboration skills. Throughout my career, I have consistently delivered high-quality, efficient code that meets project requirements and exceeds user expectations. I am committed to staying up-to-date with the latest industry trends and technologies, and I am constantly expanding my skill set.

EDUCATION

National Open University,
Abuja, Nigeria
PGD: Information Technology (In View)
Expected Graduation: September 2025

Federal Polytechnic Nekede,
Owerri Imo State
HND: Computer Science
September 2017

Aunty Ayo Academy,
Tungan-Maje, Abuja Nigeria
NECO: Senior School Certificate Examination
July 2008

Lucy Memorial Nursery & Primary School,
Madalla, Niger State
FSLC: Primary School Certificate
July 2002

PROFESSIONAL SKILL

Data Analytics
Statistics, Excel, SQL, Python

Web Development
HTML, CSS, JS, Tailwind, React, Next

Graphics Design
CorelDraw, Canva

Computer Repairs & Maintenance
Software Installation, OS Installation, Troubleshooting

WORK EXPERIENCE

IT Instructor (Web Development, Data Analytics, Graphics & Hardware)

January, 2022 – Present

iNoble Ict Hub

Description:

As an IT Instructor with expertise in web development, data analysis, graphics design, and hardware maintenance, I provided comprehensive instruction and guidance to students pursuing knowledge in various disciplines within the field of Information Technology. My role encompassed a multifaceted approach aimed at equipping students with practical skills and theoretical knowledge across diverse domains.

Key Responsibilities:

- Developed and customized course materials for multiple disciplines, including web development, data analysis, graphics design, and hardware maintenance. Ensured alignment with industry standards and emerging trends in each respective field.
- Conducted engaging lectures, workshops, and practical sessions covering topics such as HTML, CSS, JavaScript, Python programming, Excel, SQL, hardware troubleshooting, and system maintenance.
- Facilitated project-based learning experiences to encourage students to apply theoretical concepts to real-world scenarios. Supervised student projects in web development, data analytics, graphic design, and hardware configuration, fostering creativity and problem-solving skills.
- Provided hands-on technical support and guidance to students undertaking web development projects, data analysis tasks, graphic design assignments, and hardware maintenance exercises. Assisted students in troubleshooting software and hardware issues and offered personalized assistance as needed.
- Designed and administered assessments, practical exams, and portfolio reviews to evaluate student performance and comprehension across diverse disciplines. Offers constructive feedback and mentorship to help students improve their skills and achieve academic success.
- Stayed current with the latest advancements in web technologies, data analysis tools, graphic design software, and hardware components through continuous learning and professional development activities. Integrated new knowledge and best practices into instructional methodologies.

Achievements:

- Developed a comprehensive curriculum for each discipline, resulting in well-rounded educational experiences for students and increased enrollment in specialized courses.
- Led workshops and seminars on emerging trends such as data analytics, responsive web design, and computer hardware upgrades, enhancing students' exposure to industry-relevant skills.
- Mentored students in participating in coding competitions, design contests, and hardware hackathons, resulting in numerous awards and recognition for their achievements.
- Established partnerships with industry professionals and local businesses to provide students with internship opportunities and job placement assistance, contributing to their career readiness and professional development.

Web Development and Social Media Manager

January, 2019 – December, 2022

Iracoda Group Limited.

Description:

- Design and development of over 10 (ten) responsive websites, developed a database management system, managed all the social media handles and a project team communication member.

Responsibilities:

- Designed and developed over 10 responsive websites, ensuring optimal user experience across various devices and screen sizes.
- Developed a database management system to efficiently organize and secure office data, utilizing Excel and Google Drive for data storage.
- Managed all social media handles, including Facebook, Instagram, Twitter, and YouTube, overseeing content creation, advertising, and promotion strategies.
- Led project team communication efforts, ensuring effective collaboration and coordination among team members.
- Implemented and managed websites from registration to deployment stage, overseeing every aspect of the process to ensure seamless functionality and user satisfaction.
- Utilized custom email channels for effective communication between staff, users, and management board members.

Achievements:

- Achieved 100% user satisfaction with the websites developed, reflecting the success of the design and development efforts.
- Successfully organized all office data on a secure database system, enhancing data management efficiency and security.
- Facilitated effective communication between staff, users, and management board members, contributing to streamlined operations and decision-making processes.
- Generated significant traffic on all social media handles through targeted advertising and promotional campaigns, increasing brand visibility and engagement.

Graphic Designer

Aravind Architecture Limited.

Jan. 2018 – Aug. 2018

Description:

Design patterns using graphics and Engraving Software

Responsibilities:

- Utilized graphics and engraving software to design intricate patterns for various applications.
- Designed patterns using software compatible with plasma, laser, and wire cutting technology, such as Ucam, ensuring compatibility and accuracy in production.
- Collaborated with team members to conceptualize and develop unique designs tailored to client specifications and project requirements.
- Contributed to the development of the company by designing and producing over a thousand patterns, meeting tight deadlines and quality standards.

- Ensured 100% customer satisfaction by delivering high-quality designs that exceeded client expectations and enhanced the visual appeal of architectural projects.

Achievements:

- Achieved 100% customer satisfaction through the creation of visually appealing and technically precise patterns, enhancing the company's reputation for quality and innovation.
- Produced over a thousand patterns within the specified timeframe, demonstrating efficiency, creativity, and attention to detail in design execution.
- Played a key role in contributing to the development and success of the company through the creation of patterns that met client needs and enhanced project outcomes.
